Existing View from the North, (Residential)

New View from the North, (Residential)
Exsting View from the Northeast

New View from the Northeast

Proposed AT&T Tower Location
AT&T Site Name: RED FISH LAKE
AT&T Site Number: IDL04521

Existing View from the East

New View from the East
Existing View from the South

New View from the South

Proposed AT&T Tower Location
Existing View from the West (Red Fish Lake)

New View from the West (Red Fish Lake)

Proposed AT&T Tower Location
Beyond the tree line.
The new tower at 195’ would likely break the view plane (blue line), if there are no trees on the western knoll. With trees on the western knoll the view plane is higher (red line), and it would be unlikely that the new pole would break this plane. In either case, this explains why the current site is difficult/impossible to see from the dock.
